

Dear Uncle,

I reached out to Fr Arosh to obtain feedback regarding the recent Solar distribution for the 75 families. I asked Fr the below questions which he provided feedback, highlighted in yellow.

1. Do most families fix the Solar Panel to the roof?

YES. But I have advised them to take it to inside during the night so as to ensure its durability.

2. How many lights can be lit up?

There are four ports, but came with the unit 3 bulbs only.

3. how long does the lights stay ON in the dark?

One LED light- 25 hours

Two lights- 12 hours

Three lights- 8 hours

4. how long does it take for the battery to fully charge?

10-12 hours

FM & MP3- 15 hours

5. Is the length of the connector wires long and easy to connect?

It is very easy to connect, but the length of the wires are not enough as they have a same length. So, it cannot be extended to another room.

6. Is there an indication to show that the battery is fully charged?

Yes. When it is fully charged all 4 red indicators are lit.

7. If a bulb is not working, can it be replaced with a normal bulb?

Yes. With a screw type bulb.

8. any other feedback-

Actually, the units sent by you were more advanced and user friendly than the previous lot I got. Also, it was very handy.
